General Books LLC. Paperback. Book Condition: New. This item is printed on demand. Paperback. 70 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1866. Excerpt: . . . exists. Let the body, then, be represented in its three essential parts, thus--Head, Trunk, and Limbs. All Force is primarily got-up or generated by the Organs of Nutrition in the Trunk. When the physical organism has got and assimilated all the matter and force requisite for its own structure and action, the surplus is translated to the brain, for the higher sensitive and thinking-life; or for the more perfect performance of the inferior functions controlled by the nerves. The power is of course a fixed and Almost every function of every organ, has a distinct nerve for its performance: hence nutrition is hindered by diminishing nervous force. Nervous influence, says Claude Bernard, acting upon the glands, is capable of accelerating or retarding the absorption of oxygen in the very depth of our tissues. See also Dr Brown-sequabds lectures on the Nervous system. If muscle is not used, then it becomes oxidized, and converted into electric or calorific force; so, electro-motive force disappears during the activity of a nerve or muscle. I do not, for popular comprehension, enter into the minutiaj concerning the correlation of Force. It is here enough that I regard the nerves as conveying an exciting or directing power, as a spark to gunpowder, or the guider to the engine; but it must be recollected always that as the guider cannot give steam, nor the spark explosive-force (disturbed chemical cohesion), so the nerves cannot give working-power to the muscle--for that can...
